FROM: Mike Matthews
CC: Keith Jackson
SUBJECT: PPO Prevailing Medical Guidelines

Effective January 1, 2006, BellSouth's MAP plan administrators will use their prevailing medical guidelines to determine benefits in the following areas:

- Routine colorectal cancer screening
- Non-Oral types of birth control

Optometrists will be considered valid providers when performing services for which they are licensed.

These changes will allow our medical plan carriers, including the PPO, to apply their standard plan provisions in the above mentioned areas.
